Owls Finished Strong And Won **P. & M. Clerks Won First Game of Duckpin Match** **But the Hoo-Hooes Were There at the Finish.**

Sometimes they come back, it seems, which is the reason why the Owls' special duckpin team came out winners on Monday evening at the Rose-alley in their match with the Porteous & Mitchell clerks. In the first place the Porteous & Mitchell, five showed how they could come back after their defeat last week, for they started on the match on Monday night by leading the Owls 4 pins and looked to have the match clinched this time. But the Owls had got on two legs, and when they came to the line for the second string they crashed into the pins with devastating effect, and the finish of the string left a margin of 53 on the P. & M., which gave the Owls a lead of 6 pins in the match, up to this point.

This they increased by 43 pins on the third string finishing 43 pins ahead for the grand total, 1383 to 1244. Captain Donahue for the Owls rolled high individual strikes in the first game of the match, 276, and Capt. Jerry Donahue's 274 led the P. & M. five for the match. The Owls' five took the high individual string with 95. The scores:

YALE HAS ENOUGH ON PITCHING STAFF.
Tommer considered the Most Likely One at This Date.

The battery candidates for the Yale baseball team have begun their work in the gymnasium, and each afternoon it looks as if there was already sufficient enthusiasm to win the championship. Only the battery candidates are having regular work, but the other members of the squad spend a great part of the time playing handball. Except for the regular work, the battery candidates are practicing their batting, and the other members of the squad are practicing their fielding. The annual reports of two of the independent steel companies—Cambridge and Bethlehem—showed that in spite of unfavorable trade conditions in the last part of 1910, they had made large gains in earnings. The Bethlehem company reported the largest earnings in the history, with a surplus, after payment of fixed charges and a liberal appropriation for depreciation, of about 14 per cent on the preferred stock.

The determination of the Interstate Commerce commission to adhere strictly to its ruling in the freight rate cases was shown in its refusal to permit the railroad to postpone withdrawal of their advanced tariffs. Instead of cancelling them forthwith, the I.C.C. developments gave no indications of any betterment in the position of the roads. Advice from Chicago was that traffic on the western roads was irregular, owing largely to the hesitancy of manufacturing interests.

CHANCE FOR YOUNG PITCHERS WITH THE CUBS.
Withdrawal of Vic Willis and Overall Leaves Gap to Be Filled.

According to some of the rabid followers of the Chicago Nationals the refusal of Overall and Willis to get into the Chicago team for his coming battles to the Cubs. The vacancies caused by the withdrawal of the veterans will give the recruits of Manager Chance a start a real chance to make good. Had the two old timers come to bat as was expected, the Cubs would have been a cleaning out of superfluous slugs.

UNITED STATES METAL PRODUCTS CO.
Incorporated under the Laws of the State of Massachusetts.

The business is the manufacture and sale of metal doors, window frames, interior trim and kindred products, which have been placed in the hands of the large buildings that have been constructed during the past few years, and is constantly growing owing to the more stringent laws governing the erection of new buildings and the increased cost of wood products.

No bond or mortgage can be placed upon the property without consent of two-thirds of Preferred Shares outstanding, thus to all intents and purposes making this issue practically a mortgage. Average net earnings for past three years of the companies acting independently and in competition have been \$337,813.43 or in excess of 22 per cent. on the Preferred Stock to be issued.

Net quick assets are nearly equivalent to the entire Preferred Stock issue. This issue of Preferred Shares has been underwritten by responsible bankers and individuals. September 1st, 1910, the Company has unfilled orders on its books equivalent to 85 per cent. of the entire business of the preceding year, since which time it has booked many large contracts. We offer above 7% Cumulative Preferred Shares at \$100 each, together with a bonus of 10% common stock.

Should the investor not care to avail himself of the Common Shares bonus we will repurchase the same at \$40 per share, thus making the price of the Preferred Shares \$80 net.

We recommend this security as a safe and conservative investment. We further believe that the Common Shares will pay a substantial dividend.
